DETAILED ACTION

1. Claims 1-45 are pending. Claims 16-45 are still withdrawn from consideration as drawn to a non-elected invention. Applicant's Appeal Brief filed November 18, 2005 has been reviewed. The previous rejection is withdrawn pursuant thereto.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. No support in the descriptive portion of the specification for the terms "selector function," "selection criteria," or "attributes" is present.

Claim Rejections - 35 USC § 103

4. Claims 1-15, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Graff, US 5,802,501.

Graff discloses, e.g. Figs. 4, 4a, performing financial processing in a computer. Graff does not specifically disclose a selector function or the term attributes. As understood, selector functions and attributes used in financial processing using a computer have been common knowledge in the art. To have provided such for Graff would have been obvious to one of ordinary skill in the art. Further, as understood, the depending claims are recite subject matter, e.g. apportionment amounts, that have been common knowledge in the financial processing art. To have incorporated each with Graff would have been obvious to one of ordinary skill in the art.

5. Further pertinent references of interest are noted on the attached PTO-892.
